

BEREA COLLEGE
SCHEDULE OF CLASSES
FOR
FALL TERM 2025

Please read all instructions carefully. Course offerings, meeting days and times, and instructors as shown in this schedule are subject to revision as soon as the PDF schedule is created. Please check the course schedule available on the Office of the Registrar's website (<https://www.berea.edu/registrar/>) and available from [this link](#). The 2025-2026 Final Examinations schedule is also available on the Office of the Registrar's website.

OFFICE OF THE REGISTRAR– March 21, 2025

Fall 2025 Academic Calendar

The complete academic calendar can be found here: <chrome-extension://efaidnbmnnnibpcajpcglclefindmkaj/https://bereafaust.wpengine.com/wp-content/uploads/2024/12/Final-Academic-Calendar-2025-2026.pdf>

August 11-15 (Monday-Friday) Orientation for International Students
August 16-18 (Saturday-Tuesday) Orientation for All New Students
August 17 (Sunday) Academic Year Opening Program and Reception
August 19 (Tuesday) Continuing Students Arrive; Labor Assignment Orientation and Training (All Students Must Attend; offices may be temporarily closed)
August 20 (Wednesday) Classes Begin
August 26 (Tuesday) Last Day to Add a Course. All Registration Procedures for Fall Must Be Completed by 5:00 p.m.* ; Last Day to Drop a Course without W on Record; Last Day to Change a Labor Position (Eligible Students)
September 1 (Monday) Labor Day: National Holiday (Classes & Non-Essential Labor Canceled)
September 16 (Tuesday) Last Day to Withdraw from a Course without WP/WF Grade Being Recorded
September 25 (Thursday) bell hooks day
October 2-3 (Thursday-Friday) Reading Period (Classes Canceled)
October 14 (Tuesday) Mountain Day (Classes & Non-Essential Labor Canceled)
October 15 (Wednesday) Midterm Grades Due at 5:00 p.m.
October 17 (Friday) Student Applications for BIST Due
October 24 (Friday) Last Day to Withdraw from a Course
November 3-13 (Monday, Nov 3 – Thursday, Nov 13) Registration for Spring and Summer Terms
November 4 (Tuesday) Election Day
November 7 (Friday) Labor Status Forms for Thanksgiving Break Due; First-Generation College Student Day
November 21-23 (Friday-Sunday) Homecoming
November 26-28 (Wednesday-Friday) Thanksgiving Break (Classes & Term Labor Canceled)
December 5 (Friday) Classes End: Last Day to Withdraw from the College without Final Grades Being Recorded; Labor Status Forms for Christmas Break Due
December 7 (Sunday) Commencement for Mid-Year Graduates
December 8 (Monday) Reading Period (Classes Canceled)
December 9-12 (Tuesday-Friday) Final Examinations
December 13 (Saturday) Last Day of Fall Labor
December 15 (Monday) Final Grades Due at noon

BEREA COLLEGE REGISTRATION FOR CURRENT STUDENTS
FOR FALL TERM, 2025
April 7-16, 2025

We hope you are ready to register for another term at Berea. Please arrange to meet with your advisor between Monday, March 24 and Friday, April 4 to plan your schedule. You should include alternate courses in the event your preferred courses are not available at the time of registration.

COMPLETE THE FOLLOWING PROCEDURES IN THE ORDER GIVEN FOR REGISTRATION:

1. Contact your academic advisor for an appointment to plan your academic program.
2. You are expected to do preliminary planning of your schedule prior to your meeting with your advisor. Also, be prepared to discuss with your advisor your future career plans and how you are currently progressing. Please bring a copy of your degree audit (listed as Degree Evaluation) along with other relevant materials with you to the appointment with your advisor.
3. After your schedule(s) is completed, your advisor will give you an alternate PIN (which is a personal Identification Number to use for registration only). This PIN is equivalent to the advisor's signature and indicates that the two of you have met and completed the schedule planning process. You will be asked for your Alternate Pin after you go in to the Registration screens. **Please take care not to misplace this important part of your registration information – only your advisor can give it to you again. The Office of the Registrar will not provide a student with their PIN during the initial registration period.**
4. Use your alternate PIN to begin your registration on myBerea according to the schedule below. (You will not be able to register until your scheduled time. Action Item Processing must also be completed before you will be able to register.) The Web registration screens provide instructions on how to proceed with registration.
5. Please be aware that your labor contract for spring must be completed prior to registration.

ORDER OF REGISTRATION

Registration day and time is determined by the number of credits you have earned (**does not include the credits for which you are currently enrolled**). Please check the menu on myBerea for the section "Check your Registration Status" to view your assigned time for registration. This will also give you access to see if you have any holds that would prevent your registration (Emergency Contact Information Update, Financial Aid, Student Payroll, Student Accounts). Any holds will need to be cleared through the office that placed the hold on your record before you can register.

	Credits Earned	Day of Registration	You may begin registering at:
Group 1	>= 24	Monday	7:30 AM
Group 2	15 to 23.99	Tuesday	7:30 AM
Group 3	7 to 14.99	Wednesday	7:30 AM
Group 4	0 to 6.99	Thursday	7:30 AM

ACTION ITEM PROCESSING

Complete the Action Item Processing to update your address and emergency contact before registering. Use [this link](#) to begin OR go to

myBerea > My Accounts > Account Information > Action Item Processing to complete this process. You will not be able to register until this is completed.

CLOSED CLASSES, COURSE TIME CONFLICTS, PREREQUISITES

You will not be required to get the signature of your advisor if you encounter closed classes, have a course time conflict, or if you have problems with prerequisites. Instead, please contact the instructor of the course. If you are given permission to enroll in the course, that instructor will process the override and you must then register for the course by going back to the Web Registration page in myBerea.

INTERNSHIP AND INDENDENT STUDY

To register for any Internship, you must submit the appropriate application materials with required signatures to the Internship Office. Be sure you are aware of deadlines. The Internship Office will submit a list of the approved internships to the Office of the Registrar (116 Lincoln Hall) for registration processing.

Procedures concerning the approval of Independent Studies (390/490/090 A or B) and Team Initiated Studies (397/497 A or B) are provided in the catalog online at this link: <https://bera.smartcatalogiq.com/current/catalog/about-academics/opportunities-common-to-many-fields-of-study/indendent-study-and-team-initiated-study/>

REGISTRATION PROCEDURES FOR APPLIED MUSIC (PRIVATE LESSONS)

You will sign up for these courses in the Music Building (Presser Hall) at the beginning of the Fall and Spring terms. The Registrar will register you for these courses once the list of students is completed.

CHANGE OF PROGRAM (DROPPING/ADDING COURSES)

You will be permitted to drop-add, without fee, anytime between the time you register and Tuesday, August 26, 2025, by Web Registration. After these dates, you are not permitted to add a course. To withdraw from a course, you will need to process an electronic [drop form](#) from the Registrar's Forms Page with your advisor's signature. Any course withdrawals after August 26, 2025, will be assigned a withdrawal grade.

POLICY REGARDING COURSES DROPPED

Courses dropped during official registration periods or the date posted on the [Fall Academic Calendar](#) will not be reflected on the permanent record. The letter "W" (withdrawn) will be used to indicate courses dropped during the time indicated to withdraw from a course with a grade of W on the academic calendar. You may withdraw from a course during the time indicated to receive a WP or WF on the academic calendar and your instructor will be asked to indicate the quality of any completed work to that point with a "WP" (withdrawn passing) or a "WF" (withdrawn failing). No course may be dropped during the final seven weeks of the term. WP/WF will not be counted in calculating the GPA. (See calendar above for official drop/withdrawal dates.

TEACHER CERTIFICATION

Students planning to complete requirements for teacher certification must follow the guidelines given in "Program for Preparation for Teachers" in the Berea College Catalog.

COURSE FEES

Course fees, shown in the Schedule of Classes and in the current Berea College Catalog, are charged to the student's account. The fee is automatically charged upon registration for the course. The student's account is credited if the course is dropped by the end of the first week of class as indicated in the official College calendar.

SCHEDULE OF CLASS HOURS

Letters following course numbers (A, B, C, etc.) indicate sections of the same course. Letters attached to the course (i.e., 186A) indicate a specialized topic. The time of the class meeting is indicated by CLOCK hours, (e.g., 0800 is 8:00 am, 1000 for 10:00 am, 0100 for 1:00 pm). The days of class meetings are indicated as follows: M=Monday, T=Tuesday, W=Wednesday, R=Thursday, F=Friday, Saturday=ST.

CONVOCATION CREDIT

All students will automatically be enrolled in a .25 credit convocation course (CNV 100) during each of their regular terms of enrollment, with the exception of the final term of enrollment, for a maximum of eight such terms. For each term of enrollment in CNV 100, the student will earn a grade of CA (which is calculated as an A in the GPA) for attending at least seven convocations. The grade of CF (which is calculated as an F in the GPA) will be awarded for attendance at fewer than seven convocations.

Enrollment in this course is optional during the final term at Berea and is prohibited if the student has already enrolled in this course eight terms.

BEREA COLLEGE BUILDING ABBREVIATIONS

Abbreviations used in this schedule for the campus buildings are as indicated below. Rooms are numbered so that all 100 series numbers are on the floor entered from the main entrance. Rooms are numbered clockwise beginning with the first to the left of the entrance. For each listing, the number and the building abbreviation are given (e.g., F 101 is on the first floor of Frost Building).

AG	Agriculture Building
AB	Art Building
BI	Bingham Hall
CM	CMIT
DA	Dana Hall
D	Draper Building
DT	Danforth Technology
EM	Emery Building

F	Frost Building
JD	Jelkyl Drama Center
KH	Knapp Hall
MC	MAC Building
P	Presser Hall
PS	Phelps Stokes
S	Seabury Center
SH	Stephenson Hall

IMPORTANT

Course Loads: The Maximum course credit load is 4.5 for all full-time students. Requests for course overloads can be made by the student by completing an [Overload Form](#) which is available on the forms page of the Registrar's webpage. Overloads will be added to the student schedule after the necessary approval signatures are collected electronically.

Underloads: For degree candidates, all class underloads (less than 3 credits) must have prior approval of the Student Admission and Academic Standing Committee. Requests for course underloads should be submitted to the Office of Student Success and Transition.

SATISFACTORY ACADEMIC PROGRESS

Students will be placed on Academic Probation at the end of any regular term for failure to maintain a minimum 2.0 cumulative grade point average (GPA) or meet the credits requirement identified in the Satisfactory Academic Progress (SAP) chart listed in the College Catalog (<http://catalog.berea.edu/Current/Catalog>).

Students who are deficient in meeting the SAP requirements may make up the deficiency during the Summer Term at Berea College or another regionally accredited institution. If credit is to be earned elsewhere, permission must be secured by completing the [Application for Transfer Credit form](#) prior to enrollment.

Note on General Education Perspectives and Ways of Knowing, Values, and Richnesses:

Students that were admitted in Fall 2024 should look at the Ways of Knowing, Values, and Richnesses section – most other students should look at the General Education Perspectives section when making course choices.

Fall 2025 Special Topics Course Descriptions

AFR 186 LL – Intro to Africana Womanism

This course presents paramount elements, arguments, and theories of Africana womanism. Students will learn about the cultural, social, political, educational, and artistic herstory of Africana womanism from its origins in everyday praxis and rise in literature, to its critical theorizations, contentious arguments, and its global influence and impact. Following several Africana womanist scholars, students will engage conflict between the mainstream (read: white) feminist, the Black feminist, the African feminist, and the Africana womanist. This course calls attention to Africana womanism's contributions to efforts centering the study of race, anti-Blackness and antiAfricanness, capitalism and class struggle, sexuality, and sexism and heteropatriarchy. Strong emphasis will be given to womanist discourses on love, respect, humanity, survival, family, and community throughout the African diaspora.

AFR/HIS 286 JK – Black Medicine and Technology

This course examines how race, culture, and science have transformed medical and technological history from the period of enslavement to the present. Physicians, scientists, social scientists, and historians have had a long and complicated history with the construct of race. Although we have relegated controversies such as eugenics to the dustbins of history as evidence of science's racist past, we would be foolish to think that science and technology always move forward toward greater and greater enlightenment. Racist ideas about group difference persist in the ways we conceptualize and conduct scientific investigations and in how we implement clinical practice or understand and interface with technology.

ARH 286 - Becoming American

This course explores histories of immigration, assimilation, and the revival of cultural distinctiveness in the United States across a broad chronological period, focusing primarily on the legacies of immigration that shaped the early decades of the twentieth century and their reverberations in contemporary art and culture. Centering on migratory groups—from a range of ethnic and geographic backgrounds—who relocated to the United States in hopes of finding a better life, the class is designed to frame the complex processes of becoming American as both an achievement and as a painful loss of cultural difference. We will engage with shifting constructs of national identity and legacies of rupture and resettling through a careful study of film, photography, literature, curatorial practices, painting, sculpture, architecture, the graphic arts, performance, and visual culture.

BIO 286 LB – Cave Biology

This course will provide an introduction to the fundamentals of cave biology. Specifically, students will learn about the biodiversity, biogeographic distributions, and evolutionary pathways observed within cave fauna. While global trends will be discussed, emphasis will be placed on regional subterranean systems in Kentucky. As an introductory field course, students will also learn how to apply safe and effective research techniques within cave systems.

BUS 286 IN – Arts Marketing

Students will develop a digital presence to market and promote their own art and work on an arts administration project with a community partner. We will explore changing business models and innovation in various arts disciplines. (must have an arts portfolio that can be digitally showcased)

CSC 186 DW – Introduction to Data Science

The world is amassing ever-increasing amounts of data. Data is created every time you take a photo, send a text, click on a link, make a purchase, visit a hospital, etc. Understanding this data is vital to businesses, governments, and other agencies in solving problems ranging from developing better targeted marketing to saving lives from the spread of deadly disease.

Data Science is a relatively recent interdisciplinary area of study that is concerned with the collection, preparation, analysis, visualization, management, and preservation of data. This course introduces some of the computational and statistical methods needed to convert data into information via the identification of patterns and the presentation of data visualizations.

Students will employ real-world datasets to better understand problems such as COVID-19, climate change, happiness index, and other global and regional issues. This course is beginner-friendly. No previous background in statistics or in computer science is required.

ETAD 386 WW – Intro to Autonomous Systems

This course introduces students to the hardware foundations of robotics and autonomous control algorithms for navigation. Students will work in teams to design, implement and test algorithms for an autonomous navigation system for a mobile robot. In the process, students will learn basics of C++ programming languages, how to gather data about the world from sensors, controlling actuators to navigate an environment, and modeling input and decisions as graphs. This is an ideal hands-on exploratory course for students in technical STEM disciplines. This course will be co-taught with students and faculty from Berea College and the University of Michigan.

PHY 186 TM - Energy, Environment, & Climate

The planet Earth has two primary sources of energy: one source is geological, and the other is solar. These two sources of energy make life possible. Humans have discovered and developed methods to extract such energy for technological advancements that improve our standard of living. However, these advancements come at a cost. It is currently the scientific consensus that climate change is the dominant energy-related environmental issue of the twenty-first century. This course will explore energy sources and the technologies they have led to. We will compare energy production and usage in various technologies such as wind, water, solar, nuclear, and fossil fuels. We will study how technological advances impact our environment and climate as well as the role technology plays in population dynamics.

PHY 186 TH - Solar System Astronomy

An introduction to the origin, nature, and evolution of the Solar system and the physical environments of the planets. Emphasis is on the impact of human exploration on both understanding our place in the universe and its unintended consequence in modifying the environment in which we live. Three one-hour lecture periods and one laboratory session each week. Natural Science Laboratory and Sustainability. Pre-requisite: MAT 011 or higher.

THR 186 SS – Stagecraft

Students will learn stage safety, set construction, and stage electrics through lecture and hands-on projects. Students will be trained on all shop equipment and tested on proper use. Students will learn various set construction techniques culminating in planning and building scenic elements, such as platforms and flats. Students will also learn stage electrics basics, such as safety, equipment, and lighting hang and focus. This will provide the foundation for technical theatre skills.

Fall 2025 Art/Art History Topics Course Descriptions

ART 200F - Nature Drawing and Embroidery

This course is a studio art experience exploring the techniques and expressive possibilities of natural journaling and embroidery. Using nature as inspiration, students will engage with observational drawing, nature journaling and note taking, and embroidery focused on the natural world. Students will write about, present, and discuss their work and the work of others. No previous experience in drawing or embroidery is necessary. This course counts as a Creative Arts credit.

Fall 2025 English Topics Course Descriptions

*****Fall 2025 English Topics Course Descriptions have not yet been provided*****

Fall 2025 L&I 300 Course Descriptions

Adam Edelman: “Nature Is What We Know / But Have No Art To Say”: Intersections of Sustainability and Christian Theology in 19th Century American Poetics

This course examines the intersection of Christian theology and sustainability through the lens of 19th century American poetics. By investigating how writers such as Samson Occom, William Apess, Ralph Waldo Emerson, Henry David Thoreau, Walt Whitman, Emily Dickinson, Herman Melville, Edgar Allan Poe, and others negotiated concepts of faith, nature, and ethical responsibility in a rapidly industrializing world, students will engage with a range of literary and theoretical perspectives, interrogating how changes in poetic form reflect a larger history of ideas and culture around divinity and nature. Through a selection of readings in poetry, prose, and scholarly texts, we will discuss and compare instances of Christian theological frameworks informing philosophies of transcendentalism, conceptions of land stewardship, indigenous resistance to colonial expansion, and the ethical problems underlying American ideas of modernization and progress.

The course will highlight the poetic imagination as a catalyst for ethical and spiritual inquiry by asking how literary texts bridge theological and ecological concepts and critiques. We will consider the extent to which 19th-century American poets and writers anticipate contemporary environmental and theological debates and formulate scholarly arguments about what their works might offer today's conversations on sustainability, faith, and the literary imagination.

Chris Green: Just Berea Stories.

This class mixes dramatic practices, historical research, cultural geography, and critical reflection.

Who are you? How did you get to Berea? Where did you come from and who are your people? How about the others in our class? Who else lives and has lived in Berea and the surrounding area? What was our college like, say, in 1878? Who lived here 2,000 years ago? What mattered to them? What became of everyone? What will become of us? And what are WE going to do for the future?

We will share your answer to those questions by embodying the truths you discover (about ourselves, about Berea, and about the history and area we are part of) in living character portraits and create a historical pageant. I think it will be quite an experience!

Tara Kohn: Becoming American: The Immigrant Journey in Art and Culture

This course explores histories of immigration, assimilation, and the revival of cultural distinctiveness in the United States across a broad chronological period, focusing primarily on the legacies of immigration that shaped the early decades of the twentieth century and their reverberations in contemporary art and culture. Centering on migratory groups—from a range of ethnic and geographic backgrounds—who relocated to the United States in hopes of finding a better life, the class is designed to frame the complex processes of becoming American as both an achievement and as a painful loss of cultural difference. We will engage with shifting constructs of national identity and legacies of rupture and resettling through a careful study of film, photography, literature, curatorial practices, painting, sculpture, architecture, the graphic arts, performance, and visual culture.
